

Fee Schedule

The following tests and fees are provided for use **by veterinarians**. Veterinarians may request an account with DCPAH by calling the laboratory at 517.353.1683 or through our website, animalhealth.msu.edu. Tests and fees are subject to change. Current information is always available online. Please contact us with any questions about our services.

If you are an animal owner and wish to submit specimens, please contact your local veterinarian. Fees charged by veterinarians typically reflect the time, expertise, and expense necessary to draw the sample, ship it in an appropriate manner, and provide treatment advice based on interpretation of test results. It is standard for diagnostic fees charged by veterinarians to exceed the laboratory test price.

Biopsy & Immunohistochemistry

Some types of tissues (eye; bone; tooth; amputated tail, limb, jaw, toe) will incur charges in addition to the standard biopsy fee due to processing required. Additional fees are also applied to full margin evaluation studies and are dependent on the longest dimension of the submitted sample. Multiple biopsies/tissues taken at the same time from the same animal will incur a small additional fee rather than a full biopsy charge for each. Please see below and/or the test catalog available at animalhealth.msu.edu for more information on additional fees.

DCAH Policies

Fees are subject to change without notice. Please refer to our website (animalhealth.msu.edu) for a complete list of services and current prices.

Also available online:

- Submission and specimen information for every test performed
- Shipping requirements
- Access to results
- Answers to frequently asked questions
- Laboratory contact information and hours
- News and announcements
- Current and past issues of our client newsletter, *Diagnostic News*, with diagnostic- and disease-related information and articles for practitioners as well as DCAH business tips for clinic staff

All current charges are due within 28 days of the print date on the statement unless otherwise noted. Accounts not paid within the stated time period are subject to penalty. These penalties include: a finance charge of 1.5% applied to balances greater than 28 days; denial or cancellation of future services; placement with a collection firm which includes an additional processing fee. Please be assured that we will make every effort to work with clients to resolve billing payment issues. Please contact our Business Office at 517.353.3045.

Additional charges may be necessary for analysis of non-standard samples. Under these conditions, analyses will be initiated only after consultation with the client and with the client's consent.

A handling fee will be assessed for shipping specimens to referral laboratories (in addition to the test cost) or for returning specimens to clients.

DCAH reserves the right to subcontract any work required to complete testing of any and all submissions. Any subcontracted work will be indicated as such on the laboratory report.

Special projects/consultations can be arranged with faculty members for a prearranged fee. Contact the lab at 517.353.1683.

To encourage collection and submission of an adequate number of samples for diagnosis, selected tests are available at reduced rates when samples are submitted as a group from one herd or flock. Price breaks occur between 10 and 11 animals, 25 and 26 animals, and more than 100 animals. Visit our website for additional information or contact the lab directly.

The sender is responsible for postage and/or special delivery charges on packages sent to DCAH. Adherence to mailing regulations is the sender's responsibility.

All samples and specimens submitted become the property of DCAH and will not be returned unless specific arrangements are made and approved by DCAH management. The submitter is responsible for all fees associated with the submission.
