

QuickVet[®] Specialty Analyzer[™]

The QuickVet[®] Specialty Analyzer[™] brings state of the art technology to the veterinary practice and into the field. It provides rapid and accurate results in a short time. The QuickVet[®] Diagnostic System consists of tabletop analyzer and single-use disposable test cartridges based on Capillary Driven Micro Fluidic technology.

Using lab-on-a-chip technology the QuickVet[®] Specialty Analyzer[™] enables veterinarians to obtain critical diagnostic information about their patients by just three simple steps.

1 Insert the single-use cartridge.

2 Add sample.

3 Read the result.

Currently, the QuickVet[®] Specialty Analyzer supports three different test types:

**New test parameter:
Feline Blood Typing[™] Test**

Coagulation: PT/aPTT for canine & feline

Fibrinogen: Equine and Canine

Blood typing: Canine and Feline
