

**"Practical"
Oncology
SEMINAR**

October 24 & 25, 2015 - Lufkin, TX

~~~~~

\$150/day "Early Bird" Savings  
until Midnight - Sept. 22, 2015

**17 CE Hours**

**Sponsor: ETVMA**

*Dr. Wendy Blount*

*Be your very best when your patients need you the very most!*

## Abbreviations

|              |                                                       |              |                                                                      |
|--------------|-------------------------------------------------------|--------------|----------------------------------------------------------------------|
| <b>ACA</b>   | AdenoCarcinoma                                        | <b>CVP</b>   | Cyclophosphamide, Vincristine, Prednisone                            |
| <b>AE</b>    | Adverse Effect                                        | <b>D5W</b>   | Dextrose 5% in Water                                                 |
| <b>ALL</b>   | Acute Lymphoid Leukemia                               | <b>DIC</b>   | Disseminated Intravascular Coagulopathy                              |
| <b>ALP</b>   | Alkaline Phosphatase                                  | <b>DMAC</b>  | Dexamethasone, Dactinomycin-D,<br>Melphalan and Cytosine Arabinoside |
| <b>ALT</b>   | Alanine aminotransferase                              | <b>DMSO</b>  | DiMethylSulfoxide                                                    |
| <b>AMC</b>   | Animal Medical Center New York (Lab)                  | <b>DTIC</b>  | Dacarbazine (Trade Name)                                             |
| <b>AV</b>    | AtrioVentricular                                      | <b>DV</b>    | DorsoVentral                                                         |
| <b>BID</b>   | twice daily, or every 12 hours                        | <b>FelV</b>  | Feline Leukemia Virus                                                |
| <b>BMBT</b>  | Buccal Mucosal Bleeding Time                          | <b>FeSV</b>  | Feline Sarcoma Virus                                                 |
| <b>BUN</b>   | Blood Urea Nitrogen                                   | <b>FIP</b>   | Feline Infectious Peritonitis                                        |
| <b>CBC</b>   | Complete Blood Count                                  | <b>FISS</b>  | Feline Injection Site Sarcoma                                        |
| <b>CCNU</b>  | Iomustine, Ceenu                                      | <b>FNA</b>   | Fine Needle Aspirate                                                 |
| <b>CHOP</b>  | Cyclophosphamide, doxorubicin, Oncovin,<br>Prednisone | <b>fPLI</b>  | feline Pancreatic Lipase Immunoreactivity                            |
| <b>CIC</b>   | Cyclophosphamide Induced Cystitis                     | <b>FSA</b>   | FibroSarcoma                                                         |
| <b>cKIT</b>  | Gene mutated in some Mast Cell Tumors                 | <b>GCSF</b>  | Granulocyte Colony Stimulating Factor                                |
| <b>cm</b>    | centimeter                                            | <b>GFR</b>   | Glomerular Filtration Rate                                           |
| <b>COP</b>   | Cyclophosphamide, Oncovin, Prednisone                 | <b>GI</b>    | GastroIntestinal                                                     |
| <b>COPA</b>  | Cyclophosphamide, Oncovin, Prednisone,<br>Adriamycin  | <b>GGT</b>   | Gamma glutamyl transpeptidase                                        |
| <b>CLL</b>   | Chronic Lymphocytic Leukemia                          | <b>GME</b>   | Granulomatous MeningioEncephalitis                                   |
| <b>CNS</b>   | Central Nervous System                                | <b>GSD</b>   | German Shepard Dog                                                   |
| <b>COX-2</b> | CycloOxygenase 2 (enzyme)                             | <b>H1</b>    | Histamine 1 receptor                                                 |
| <b>CP</b>    | Conscious Proprioception                              | <b>H2</b>    | Histamine 2 receptor                                                 |
| <b>cPLI</b>  | canine Pancreatic Lipase Immunoreactivity             | <b>HHM</b>   | Humoral Hypercalcemia of Malignancy                                  |
| <b>CR</b>    | Complete Response                                     | <b>HPA</b>   | HemangioPericytoma                                                   |
| <b>CSA</b>   | ChondroSarcoma                                        | <b>HSA</b>   | HemangioSarcoma                                                      |
| <b>CSF</b>   | CerebroSpinal Fluid                                   | <b>I131</b>  | Radioactive Iodine 131                                               |
| <b>CT</b>    | Computed Tomography                                   | <b>IBD</b>   | Inflammatory Bowel Disease                                           |
|              |                                                       | <b>iCa++</b> | ionized Calcium                                                      |
